

CONFERENCE IX: Strasbourg (France), 4-7 September 1997

Theme: Impact of new technologies on the communication of universities in Europe

Languages: French, English and Spanish. Simultaneous translations were provided for plenary sessions.

Plenary sessions

New technologies: Internet, multimedia, hypertext, e-mail, CD-rom, what are we talking about? The introduction of new technologies into universities raise numerous questions: Who is the webmaster? Serving the press via the Web? Graphic presentation of the web? Quality control? Financing the Web? Copyright?

Rolf Guggenbühl

From paper to on-line: training and professions, information and security, legal framework are taken into account

Technology watch and the Internet: the amount of material available on the Internet is enormous. We need to learn how to pick it out and to exploit it efficiently

Michèle Van Hollebeke
Cité des Sciences et de l'Industrie, Paris

What are we doing in European universities?
session shared by France and Denmark

New technologies and society
